

B-G2-FP

2-Gang Faceplates and Metallic Faceplate Covers for CNX-B Designer Keypads

Crestron® 2-Gang Faceplates are designed to allow any two **CNX-B Designer Series Keypads** to be mounted side-by-side in a 2-gang electrical box. A single 2-gang faceplate replaces the standard 1-gang faceplates that come with each keypad. The 2-gang faceplates are composed of plastic and are available in five textured finishes to match the keypad buttons.

Crestron Metallic Faceplate Covers are offered as an add-on to the faceplates. These covers are designed to fit over the 2-gang plastic faceplates⁽¹⁾. Options include six elegant metallic finishes, and one unfinished version primed to allow the application of your own custom finish.

NOTE: The metallic faceplate covers are composed of aluminum and may not be suitable for use in a sterile environment.
