

# External Transformer Unit 15 kVA

## Description

This External Transformer Unit acts as a frontend to make use of equipment suitable for connection to worldwide mains voltages.

It has galvanic isolation and is equipped with EMO circuits.

## Specifications

- Product name: ETU15KVA
- Input voltages: 190/200/208 V/220 V/360/380/400 V/415/440/480 Vac -3 ph / 50-60 Hz
- Voltage setting: tap up or down by internal wire
- Output voltage: 400 Vac-3 ph / 50-60 Hz
- Output Power: 0...30 kVA
- Galvanic isolation: yes
- Dimensions: 615x915x920 mm
- Weight: approx. 200 kg
- Safety: EN 61010, EN 60950, UL508
- Protections: Safety relay, Emergency Stop, Thermal protection
- Temperature range: 0...45 °C

## Applications

- Industrial applications, e.g. Electron Microscopes
