

**TC53** 

# **Voltage Detector**

#### Features:

· Highly Accurate: ±2%

• Low-Power Consumption: 1.0μA, Typ.

• Detect Voltage Range: 1.6V to 6.0V and 7.7V

· Operating Voltage: 1.5V to 10.0V

• Output Configuration: Open-Drain or CMOS

• Space-Saving 5-Pin SOT-23A Package

### **Typical Applications:**

· Microprocessor Reset Circuits

 Battery Life Monitors and Recharge Voltage Monitors

· Memory Battery Backup Circuitry

· Power-On Reset Circuits

· Power Failure Detection

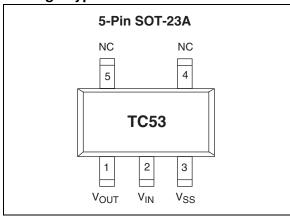

· Delay Circuitry

#### **Device Selection Table**

Part Number	Package	Temp. Range
TC53-xxxxxxxxxx	5-Pin SOT-23A	-40℃ to +85℃

Other output voltages are available. Please contact Microchip Technology Inc. for details.

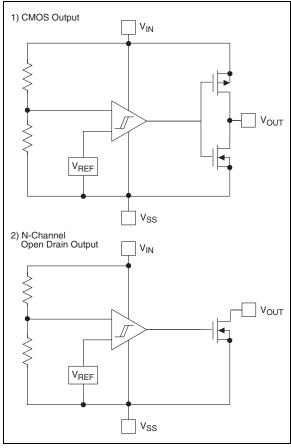

#### Package Type

#### **General Description:**

The TC53 is a low-power voltage detector. Typical supply current consumption is only  $1\mu A$  at an input voltage of 2V. The voltage detection threshold setting is factory-programmed and ensured to  $\pm 2\%$  accuracy. Threshold settings are available over a range of 1.6V to 6.0V. The TC53 has both complementary (CMOS) and open drain (NMOS) output configuration options. TC53 is the ideal voltage detector for precision applications in which small size, low installed cost, high accuracy and low supply current consumption are critical.

### **Absolute Maximum Ratings†**

 †Stresses above those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions above those indicated in the operation sections of the specifications is not implied. Exposure to Absolute Maximum Rating conditions for extended periods may affect device reliability.

Note 1: An additional resistor between the V<sub>IN</sub> pin and the supply voltage may alter the electrical characteristics due to the increasing values of V<sub>DD</sub>.

<sup>2:</sup> The power consumption during power-start to output being stable (release operation) is 2μA greater than it is after that period (completion of release operation) because of rush current in the delay circuit.

**NOTES:** 

#### Note the following details of the code protection feature on Microchip devices:

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the
  intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our
  knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data
  Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- · Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as "unbreakable."

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

QUALITY MANAGEMENT SYSTEM

CERTIFIED BY DNV

ISO/TS 16949:2009

Microchip received ISO/TS-16949:2009 certification for its worldwide headquarters, design and wafer fabrication facilities in Chandler and Tempe, Arizona; Gresham, Oregon and design centers in California and India. The Company's quality system processes and procedures are for its PIC® MCUs and dsPIC® DSCs, KEELOQ® code hopping devices, Serial EEPROMs, microperipherals, nonvolatile memory and analog products. In addition, Microchip's quality system for the design and manufacture of development systems is ISO 9001:2000 certified.
