

protoZ™

Ready-to-Fly 100 mm Electric
Micro Drone

ESTE4611

Diagonal Measurement: 100 mm (3.9 in)

Weight: 17 g (0.59 oz)

Requires: 2 x "AAA" batteries

A blast of micro-sized fun!

There's no doubt about it: the Proto-Z is the fastest, easiest and most economical way to start enjoying fast-paced fun indoors! Its bright LEDs make it easy to track in the darkest rooms and the controller lets you choose whether you fly in normal flight mode or True Direction mode. True Direction is a big plus for first-time flyers, because it moves the Proto-Z in the same direction the control sticks move. It comes with a built-in LiPo battery that lets you fly for up to 7 minutes – and recharges in just 15.

Includes:

- Assembled Proto Z with multi-colored LEDs
- 2.4GHz controller with two flight modes & flip buttons
- Built-in, 110mAh LiPo flight battery & USB charger
- 4 extra blades
