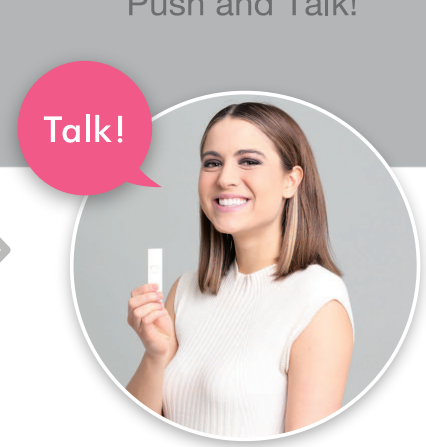
CES INNOVATION AWARDS 2016 HONOREE

Wearable Translator

The world's first wearable translator—breaking the language barrier and making communication happen.

iamili.com

Simple and Easy.
Push and Talk!



ili is for travelers going to places where they are unfamiliar with local languages.
With ili, you can navigate new languages to communicate with locals and make wonderful memories.
Start your next journey with ili and make new friends in the global village.

More language options coming!

1st Ver.	2nd Ver.	3rd Ver.
• English	• French	• Spanish
• Japanese	• Thai	• Italian
• Chinese	• Korean	• Arabic

Designed for Travelers

No need for the Internet

There's no need to worry about finding a good comnnection anymore. You can use ili anytime, anywhere. It works without Wi-Fi, 3G, or any other internet connection.

Loud and Clear

ili's microphone accurately picks out your voice even in an environment such as a market, pub, or urban clutter. ili's speaker clearly projects your translated message above the background noise.

Sophisticated translation engine

All processing of voice recognition, translation, and speech synthesis is done within ili.

Proprietary dictionary

ili includes a library of travel lexicon. For travel purposes, ili outforms all existing translation engines.

Updating with revolutionary dock system

ili will become smarter with the evolution of technology. ili's docking station connects the device to the internet to retrieve the latest updates from the cloud. The docking station will keep your ili up to date.

Looking for partners!

We are looking for travel-related businesses that we can build relationships with to create a network.
