

Tamper evident security labelling, thermal transfer

• Material 1208 (White), fragmenting

Features and Benefits

The specially formulated material is made to fragment if it is picked. The construction has a weakness built in that will immediately indicate if anyone has been tampering with the label. It is extremely difficult to pick away all the fragments left behind and simply over-labelling will not work. As with all security labelling if another label is applied on top the fragmented label underneath will be seen.

Assets can therefore be marked securely and unambiguously. The labels can be printed with customer unique references using text, graphics and barcodes as required.

For problem-free printing, we recommend Tagprint Pro software, TT4000+ and TT420+ printers with TT822OUT ribbons.

Thermal Transfer Printer

A secure way of identifying ...

... if an asset label has been tampered with.

Material Data		
Material		Type 1208, Acrylate foil (AC), white (WH), tamper proof
	perating perature	-40 °C to +100 °C
Curing Temperature		From +10 °C
Recommended Ribbon Type		TT822OUT
,	Adhesive	Acrylic
Thickness of	Foil (µm)	50
	Material roperties	Resistant to oils, water and solvents
		(3(0)
