

Aluminum electrolytic capacitors

Capacitors with screw terminals

Series/Type: B43455, B43457

Date: December 2010

Long-life grade capacitors

Applications

- Frequency converters
- Uninterruptible power supplies
- Professional power supplies

Features

- Long useful life
- All-welded construction ensures reliable electrical contact
- PAPR terminals available (Protection Against Polarity Reversal)
- Version with optimized construction for base cooling (heat sink mounting) available
- Version with low-inductance design available
- Self-extinguishing electrolyte
- RoHS-compatible

Construction

- Charge-discharge proof, polar
- Aluminum case with insulating sleeve
- Poles with screw terminal connections
- Mounting with ring clips, clamps or threaded stud
- The bases of types with threaded stud and d \geq 76.9 mm are not insulated, types with d = 91 mm have fully insulated bases

B43455

B43457

Specifications and characteristics in brief

Rated voltage V_R	350 ... 450 V DC											
Surge voltage V_S	1.10 V_R											
Rated capacitance C_R	1000 ... 15000 μF											
Capacitance tolerance	$\pm 20\%$ M											
Leakage current I_{leak} (20 °C, 5 min)	$I_{\text{leak}} \leq 0.020 \mu\text{A} \cdot \left(\frac{C_R}{\mu\text{F}} \cdot \frac{V_R}{V} \right)^{0.85} + 4 \mu\text{A}$											
Self-inductance ESL	d = 51.6 mm: approx. 15 nH d ϕ 64.3 mm: approx. 20 nH Capacitors with low-inductance design: d ϕ 64.3 mm: approx. 13 nH											
Useful life 85 °C; V_R ; $I_{\text{AC,R}}$ 40 °C; V_R ; 1.5 $I_{\text{AC,R}}$	> 10000 h > 200000 h	Requirements: DC/C £ $\pm 30\%$ of initial value ESR £ 3 times initial specified limit I_{leak} £ initial specified limit										
Voltage endurance test 85 °C; V_R	2000 h	Post test requirements: DC/C £ $\pm 10\%$ of initial value ESR £ 1.3 times initial specified limit I_{leak} £ initial specified limit										
Vibration resistance test	To IEC 60068-2-6, test Fc: Frequency range 10 ... 55 Hz, displacement amplitude 0.75 mm, acceleration max. 10 g, duration 3 ´ 2 h. Capacitor mounted by its body which is rigidly clamped to the work surface.											
Characteristics at low temperature	Max. impedance ratio at 100 Hz	<table border="1"> <tr> <td>V_R</td> <td>£ 400 V</td> <td>450 V</td> </tr> <tr> <td>$Z_{-25^\circ\text{C}} / Z_{20^\circ\text{C}}$</td> <td>4</td> <td>3</td> </tr> <tr> <td>$Z_{-40^\circ\text{C}} / Z_{20^\circ\text{C}}$</td> <td>16</td> <td>12</td> </tr> </table>	V_R	£ 400 V	450 V	$Z_{-25^\circ\text{C}} / Z_{20^\circ\text{C}}$	4	3	$Z_{-40^\circ\text{C}} / Z_{20^\circ\text{C}}$	16	12	
V_R	£ 400 V	450 V										
$Z_{-25^\circ\text{C}} / Z_{20^\circ\text{C}}$	4	3										
$Z_{-40^\circ\text{C}} / Z_{20^\circ\text{C}}$	16	12										
IEC climatic category	To IEC 60068-1: 25/085/56 (25 °C/+85 °C/56 days damp heat test) The capacitors can be operated in the temperature range of 40 °C to +85 °C but the impedance at 40 °C should be taken into consideration.											
Detail specification	Similar to CECC 30301-803, CECC 30301-807											
Sectional specification	IEC 60384-4											

B43455, B43457

Long useful life 85 °C

Ripple current capability

Due to the ripple current capability of the contact elements, the following current upper limits must not be exceeded:

Capacitor diameter	51.6 mm	64.3 mm	76.9 mm	91 mm
$I_{AC,max}$	34 A	45 A	57 A	80 A

Dimensional drawings

B43455
Ring clip/clamp mounting

B43457
Threaded stud mounting

- M5: Min. reach of screw = 9.5 mm
9 mm for low inductance design
M6: Min. reach of screw = 12 mm
9.5 mm for low inductance design

Positive pole marking: +

The base of types with threaded stud and $d = 91$ mm is fully insulated (the lengths l and l_1 are increased by 0.5 mm in these cases). For types with threaded stud and $d \leq 76$ mm the base is not insulated. Also refer to the mounting instructions in chapter "Capacitors with screw terminals Accessories".

Dimensions and weights

Ter- minal	Dimensions (mm) with insulating sleeve								Approx. weight (g)
	d	$l \pm 1$	$l_1 \pm 1$	$l_2 +0/- 1$	d_1	d_2 max.	$a +0.2/ 0.4$		
M5	51.6 +0/ 0.8	80.7	87.2	17	M12	10.2	22.2	220	
M5	51.6 +0/ 0.8	105.7	112.2	17	M12	10.2	22.2	280	
M5	64.3 +0/ 0.8	80.7	87.2	17	M12	13.2	28.5	370	
M5	64.3 +0/ 0.8	105.7	112.2	17	M12	13.2	28.5	440	
M5	64.3 +0/ 0.8	143.2	149.7	17	M12	13.2	28.5	630	
M6	76.9 +0/ 0.7	105.7	111.5	17	M12	17.7	31.7	620	
M6	76.9 +0/ 0.7	143.2	149.0	17	M12	17.7	31.7	840	
M6	76.9 +0/ 0.7	168.7	174.5	17	M12	17.7	31.7	1000	
M6	76.9 +0/ 0.7	220.7	226.5	17	M12	17.7	31.7	1300	
M6	91.0 +0/ 2	144.5	149.8	17	M12	17.7	31.7	1200	
M6	91.0 +0/ 2	221.0	226.3	17	M12	17.7	31.7	1900	

Dimensions are also valid for low-inductance design.

Packing

Capacitor diameter d (mm)	length l (mm)	Packing units (pcs.)
51.6	all	36
64.3	all	25

Capacitor diameter d (mm)	length l (mm)	Packing units (pcs.)
76.9	105.7 - 168.7	16
	220.7	12
91.0	all	9

For ecological reasons the packing is pure cardboard.

Long useful life 85 °C

Special designs

- Low-inductance design
- PAPR terminal style

With our PAPR terminal style (Protection Against Polarity Reversal) we offer an optional mechanical feature in addition to the visual polarity marking on the cover disk and the sleeve, which prevents from mounting in reverse polarity. The non-circular shape of the terminals and their arrangement perpendicular to each other enables the user to definitely prevent wrong mounting with respect to polarity (Poka Yoke).

Dimensional drawing of PAPR terminal configuration

Dimensions for PAPR terminal style (mm)

Can diameter d	Terminal	$d_3 \pm 0.1$	$d_4 \pm 0.1$	a +0.2/ 0.4	Min. reach of screw	
					Standard design #050	For heat sink mounting #057
51.6	M5	10	13	22.2	9.5	
64.3	M5	13	15	28.5	9.5	7.3
76.9	M6	13	15	31.7	12.0	9.7
91.0	M6	13	15	31.7	12.0	9.7

All other dimensions of the capacitor such as diameter d, case length l and overall length l_1 are identical with those of standard capacitors of this series. Please refer to the tables "Dimensions and weights" (standard types) and "Dimensions and weights for heat sink mounting" (special designs).

- For heat sink mounting

Design for optimal connection of capacitors to the heat sink when using base cooling with the following features (refer to chapter "General technical information, 5.2 Cooling"):

Electrical insulation of the capacitors base with 2 overlapping thermal pads for optimal heat flow (minimal thermal resistance at the capacitor base)

Minimal overall length tolerance (± 0.35 mm) for mounting between heat sink and bus bar
 Case with extra groove near the base for clamp mounting (recommended ring clamp
 B44030A0165B ... A0190B)

This version is available only for capacitors without threaded stud and for diameters ≥ 64.3 mm.

Regarding ripple current and useful life, please refer to column $I_{AC,R}(B)$ in the table "Technical data and ordering codes" and in the useful life curves.

KAL1008-K-E

Dimensions and weights for heat sink mounting:

Ter- minal	Dimensions (mm) with insulating sleeve					Min. reach of screw mm	Approx. weight g
	d	$l \pm 1$	$l_1 \pm 0.35$	d_2 max.	a +0.2/ 0.4		
M5	64.3 +0/ 0.8	80.7	86.3	13.2	28.5	7.3	370
M5	64.3 +0/ 0.8	105.7	111.3	13.2	28.5	7.3	440
M6	76.9 +0/ 0.7	105.7	110.6	17.7	31.7	9.7	620
M6	76.9 +0/ 0.7	143.2	148.1	17.7	31.7	9.7	840
M6	91.0 +0/ 2	97.0	101.4	17.7	31.7	9.7	1000
M6	91.0 +0/ 2	144.5	148.9	17.7	31.7	9.7	1200

Dimensions for other sizes are available upon request.

Ordering codes:

Design	Identification in third block of ordering code	Remark
Low inductance (13 nH)	M003	For capacitors with diameter $d \geq 64.3$ mm
For heat sink mounting	M007	For capacitors with diameter $d \geq 64.3$ mm and without threaded stud
PAPR terminal style	M050	For capacitors with diameter $d \geq 51.6$ mm
PAPR terminal style and heat sink mounting	M057	For capacitors with diameter $d \geq 64.3$ mm and without threaded stud

Accessories

The following items are included in the delivery package, but are not fastened to the capacitors:

	Thread	Toothed washers	Screws/nuts	Maximum torque
For terminals	M5	A 5.1 DIN 6797	Cylinder-head screw M5 ´ 8 DIN 84-4.8	2 Nm
	M6	A 6.4 DIN 6797	Cylinder-head screw M6 ´ 12 DIN 85-4.8	2.5 Nm
For mounting	M12	J 12.5 DIN 6797	Hex nut BM 12 DIN 439	10 Nm

The following items must be ordered separately. For details, refer to chapter "Capacitors with screw terminals Accessories".

Item	Type
Ring clips	B44030
Clamps for capacitors with d ³ 64.3 mm	B44030
Insulating parts	B44020

Cautions and warnings

Personal safety

The electrolytes used by EPCOS have not only been optimized with a view to the intended application, but also with regard to health and environmental compatibility. They do not contain any solvents that are detrimental to health, e.g. dimethyl formamide (DMF) or dimethyl acetamide (DMAC).

Furthermore, part of the high-voltage electrolytes used by EPCOS are self-extinguishing. They contain flame-retarding substances which will quickly extinguish any flame that may have been ignited.

As far as possible, EPCOS does not use any dangerous chemicals or compounds to produce operating electrolytes. However, in exceptional cases, such materials must be used in order to achieve specific physical and electrical properties because no safe substitute materials are currently known. However, the amount of dangerous materials used in our products has been limited to an absolute minimum. Nevertheless, the following rules should be observed when handling aluminum electrolytic capacitors:

- Any escaping electrolyte should not come into contact with eyes or skin.
- If electrolyte does come into contact with the skin, wash the affected parts immediately with running water. If the eyes are affected, rinse them for 10 minutes with plenty of water. If symptoms persist, seek medical treatment.
- Avoid breathing in electrolyte vapor or mists. Workplaces and other affected areas should be well ventilated. Clothing that has been contaminated by electrolyte must be changed and rinsed in water.

Product safety

The table below summarizes the safety instructions that must be observed without fail. A detailed description can be found in the relevant sections of chapter "General technical information".

Topic	Safety information	Reference chapter "General technical information"
Polarity	Make sure that polar capacitors are connected with the right polarity.	1 "Basic construction of aluminum electrolytic capacitors"
Reverse voltage	Voltages polarity classes should be prevented by connecting a diode.	3.1.6 "Reverse voltage"
Upper category temperature	Do not exceed the upper category temperature.	7.2 "Maximum permissible operating temperature"
Maintenance	Make periodic inspections of the capacitors. Before the inspection, make sure that the power supply is turned off and carefully discharge the electricity of the capacitors. Do not apply any mechanical stress to the capacitor terminals.	10 "Maintenance"
Mounting position of screw-terminal capacitors	Do not mount the capacitor with the terminals (safety vent) upside down.	11.1. "Mounting positions of capacitors with screw terminals"
Mounting of single-ended capacitors	The internal structure of single-ended capacitors might be damaged if excessive force is applied to the lead wires. Avoid any compressive, tensile or flexural stress. Do not move the capacitor after soldering to PC board. Do not pick up the PC board by the soldered capacitor. Do not insert the capacitor on the PC board with a hole space different to the lead space specified.	11.4 "Mounting considerations for single-ended capacitors"
Robustness of terminals	The following maximum tightening torques must not be exceeded when connecting screw terminals: M5: 2 Nm M6: 2.5 Nm	11.3 "Mounting torques"
Soldering	Do not exceed the specified time or temperature limits during soldering.	11.5 "Soldering"

B43455, B43457

Long useful life 85 °C

Topic	Safety information	Reference chapter "General technical information"
Soldering, cleaning agents	Do not allow halogenated hydrocarbons to come into contact with aluminum electrolytic capacitors.	11.6 "Cleaning agents"
Passive flammability	Avoid external energy, such as fire or electricity.	8.1 "Passive flammability"
Active flammability	Avoid overload of the capacitors.	8.2 "Active flammability"
		Reference chapter "Capacitors with screw terminals"
Breakdown strength of insulating sleeves	Do not damage the insulating sleeve, especially when ring clips are used for mounting.	"Screw terminals accessories"

Symbols and terms

Symbol	English	German
C	Capacitance	Kapazität
C_R	Rated capacitance	Nennkapazität
C_S	Series capacitance	Serienkapazität
$C_{S,T}$	Series capacitance at temperature T	Serienkapazität bei Temperatur T
C_f	Capacitance at frequency f	Kapazität bei Frequenz f
d	Case diameter, nominal dimension	Gehäusedurchmesser, Nennmaß
d_{max}	Maximum case diameter	Maximaler Gehäusedurchmesser
ESL	Self-inductance	Eigeninduktivität
ESR	Equivalent series resistance	Ersatzserienwiderstand
ESR_f	Equivalent series resistance at frequency f	Ersatzserienwiderstand bei Frequenz f
ESR_T	Equivalent series resistance at temperature T	Ersatzserienwiderstand bei Temperatur T
f	Frequency	Frequenz
I	Current	Strom
I_{AC}	Alternating current (ripple current)	Wechselstrom
$I_{AC,rms}$	Root-mean-square value of alternating current	Wechselstrom, Effektivwert
$I_{AC,f}$	Ripple current at frequency f	Wechselstrom bei Frequenz f
$I_{AC,max}$	Maximum permissible ripple current	Maximal zulässiger Wechselstrom
$I_{AC,R}$	Rated ripple current	Nennwechselstrom
$I_{AC,R} (B)$	Rated ripple current for base cooling	Nennwechselstromstrom für Bodenkühlung
I_{leak}	Leakage current	Reststrom
$I_{leak,op}$	Operating leakage current	Betriebsreststrom
l	Case length, nominal dimension	Gehäuselänge, Nennmaß
l_{max}	Maximum case length (without terminals and mounting stud)	Maximale Gehäuselänge (ohne Anschlüsse und Gewindebolzen)
R	Resistance	Widerstand
R_{ins}	Insulation resistance	Isolationswiderstand
R_{symm}	Balancing resistance	Symmetrierwiderstand
T	Temperature	Temperatur
DT	Temperature difference	Temperaturdifferenz
T_A	Ambient temperature	Umgebungstemperatur
T_C	Case temperature	Gehäusetemperatur
T_B	Capacitor base temperature	Temperatur des Becherbodens
t	Time	Zeit
Dt	Period	Zeitraum
t_b	Service life (operating hours)	Brauchbarkeitsdauer (Betriebszeit)

Symbol	English	German
V	Voltage	Spannung
V_F	Forming voltage	Formierspannung
V_{op}	Operating voltage	Betriebsspannung
V_R	Rated voltage, DC voltage	Nennspannung, Gleichspannung
V_S	Surge voltage	Spitzenspannung
X_C	Capacitive reactance	Kapazitiver Blindwiderstand
X_L	Inductive reactance	Induktiver Blindwiderstand
Z	Impedance	Scheinwiderstand
Z_T	Impedance at temperature T	Scheinwiderstand bei Temperatur T
tan d	Dissipation factor	Verlustfaktor
l	Failure rate	Ausfallrate
ϵ_0	Absolute permittivity	Elektrische Feldkonstante
ϵ_r	Relative permittivity	Dielektrizitätszahl
w	Angular velocity; 2 p f	Kreisfrequenz; 2 p f

Note

All dimensions are given in mm.

The following applies to all products named in this publication:

1. Some parts of this publication contain statements about the suitability of our products for certain areas of application. These statements are based on our knowledge of typical requirements that are often placed on our products in the areas of application concerned. We nevertheless expressly point out that such statements cannot be regarded as binding statements about the suitability of our products for a particular customer application. As a rule, EPCOS is either unfamiliar with individual customer applications or less familiar with them than the customers themselves. For these reasons, it is always ultimately incumbent on the customer to check and decide whether an EPCOS product with the properties described in the product specification is suitable for use in a particular customer application.
2. We also point out that in individual cases, a malfunction of electronic components or failure before the end of their usual service life cannot be completely ruled out in the current state of the art, even if they are operated as specified. In customer applications requiring a very high level of operational safety and especially in customer applications in which the malfunction or failure of an electronic component could endanger human life or health (e.g. in accident prevention or lifesaving systems), it must therefore be ensured by means of suitable design of the customer application or other action taken by the customer (e.g. installation of protective circuitry or redundancy) that no injury or damage is sustained by third parties in the event of malfunction or failure of an electronic component.
3. The warnings, cautions and product-specific notes must be observed.
4. In order to satisfy certain technical requirements, some of the products described in this publication may contain substances subject to restrictions in certain jurisdictions (e.g. because they are classed as hazardous). Useful information on this will be found in our Material Data Sheets on the Internet (www.epcos.com/material). Should you have any more detailed questions, please contact our sales offices.
5. We constantly strive to improve our products. Consequently, the products described in this publication may change from time to time. The same is true of the corresponding product specifications. Please check therefore to what extent product descriptions and specifications contained in this publication are still applicable before or when you place an order. We also reserve the right to discontinue production and delivery of products. Consequently, we cannot guarantee that all products named in this publication will always be available. The aforementioned does not apply in the case of individual agreements deviating from the foregoing for customer-specific products.
6. Unless otherwise agreed in individual contracts, all orders are subject to the current version of the "General Terms of Delivery for Products and Services in the Electrical Industry" published by the German Electrical and Electronics Industry Association (ZVEI).
7. The trade names EPCOS, BAOKE, Alu-X, CeraDiode, CSMP, CSSP, CTVS, DeltaCap, DigiSiMic, DSSP, FormFit, MiniBlue, MiniCell, MKK, MKD, MLSC, MotorCap, PCC, PhaseCap, PhaseCube, PhaseMod, PhiCap, SIFERRIT, SIFI, SIKOREL, SilverCap, SIMDAD, SiMic, SIMID, SineFormer, SIOV, SIP5D, SIP5K, ThermoFuse, WindCap are trademarks registered or pending in Europe and in other countries. Further information will be found on the Internet at www.epcos.com/trademarks.
